

Continuous Stock vs. Best Value

Continuous Stock

The Continuous Stock line offers top quality, popular packaging components on a regular basis to our customers at a discounted rate. Instead of waiting 12-14 weeks, millions of our Continuous Stock items are floored at our Illinois warehouse, ready to ship in 24-48 hours. This allows you to have the packaging you need, without the long lead times. If you are limited on warehouse space, the Continuous Stock line is a perfect solution to keep your product line flowing.

Best Value Line

What is the Best Value line? It is a line of packaging that offers top quality, unbranded components at a discounted price. The Best Value line has shipments arriving each day so there is always something new to find. Most of this packaging is in stock and generally ships within 24-48 hours. However, you may need to move fast as these deals sell out quickly.

How are the products for the Best Value line found? There's a specialized team contacting companies around the world, searching for overstocked and excess packaging. This packaging is always first class quality and in the original sealed carton. The lowest price is negotiated for this premium packaging to pass on the savings, to you, our valued customer.
